INTRODUCTION

Grant Agreement Preparation Forms (GPF's) have been designed to facilitate the project negotiations and the production of the grant agreement. It is a main communication instruments between the co-ordinator representing the Consortium and the Commission's Project Officer. Essentially the forms are used to identify the beneficiaries that will sign/accede to the grant agreement, to determine the eligible costs and European Union contribution and to electronically capture structured information on work packages, efforts, milestones and deliverables. The forms also include a standard declaration to be signed by each participating organisation.

To assist the filling in of the GPF's the following is made available:

- Annotations – these are attached to the standard forms and should be read carefully
- Pre-filled legal information (see below)
- NEF – NEF is an online tool to be used by the co-ordinator and the beneficiaries to edit the content of the GPF's

Legal information is held in the A2.1 form. This information is pre-filled by the Commission services using either information taken from the Commission database or from the proposal. Depending on the validity of this information, the organisation concerned may have to supply to the Commission with a so called "identification fiche" and supporting legal documents. For instructions on this, see the annotations to the A2.1 form.

The budget table (A3.2) is to be used in Part A of Annex I of the grant agreement.

Abstract ⁹ (max. 3000 char.)

The principal objective of the NORS project is to improve the quality and validation of the products delivered by the GMES Atmospheric Service (GAS), using independent groundbased remote sensing data from the international Network for the Detection of Atmospheric Composition Change (NDACC). NDACC is a cross-border research network with a strong European contribution, providing high-quality reference observational data for understanding the physical / chemical state of the stratosphere and troposphere, and for assessing the impact of atmospheric composition changes on climate. NORS focuses on a selection of NDACC data that have high priority in the different domains of GAS, namely 'ozone and UV', 'air quality' and 'climate'. The research planned in NORS aims at tailoring these NDACC products to the needs of GAS. It includes a full characterisation of the products and an evaluation of the consistency between the ground-based data and the satellite data assimilated in the GAS production chain. As ground-based remote sensing data form the ideal link between in situ surface concentration and satellite column data, NORS will investigate how integrated tropospheric products and integrated ozone products can be developed.

The project will demonstrate operational rapid delivery of NDACC data to GAS, including a comprehensive set of metadata and a user guide. It will also develop and implement a web-based server for providing consistent validation reports of the GAS products using the NORS data products, on an operational basis. In support of the re-analyses planned in GAS, NORS will deliver time-series of ground-based data back to 2003.

The achievements of NORS will be made available to NDACC as a whole and especially to candidate NDACC stations filling gaps outside Western Europe. The project will be performed in close collaboration with relevant projects in the context of GAS, and it will liaise with NDACC, the European Environmental Agency, and major GMES/GEOSS actors.

30. Research organisation

Research organisation means a legal entity established as a non-profit organisation that carries out research or technological development as one of its main objectives.

31. Enterprise

Any entity engaged in an economic activity, irrespective of its legal form.

32. SME

SME means micro, small and medium sized enterprise within the meaning of Recommendation 2003/361/EC in the version of 6 May 2003 (see http://ec.europa.eu/enterprise/enterprise_policy/sme_definition/index_en.htm).

An enterprise is considered as an SME, taking into account its partner enterprises and/or linked enterprises (please see the above mentioned recommendation for an explanation of these notions and their impact on the definition), if it:

- employs fewer than 250 persons
- has an annual turnover not exceeding EUR 50 million, and/or
- an annual balance sheet total not exceeding EUR 43 million
- is autonomous

The headcount corresponds to the number of annual work units (AWU), i.e. the number of persons who worked full-time within the enterprise in question or on its behalf during the entire reference year under consideration. The work of persons who have not worked the full year, the work of those who have worked part-time, regardless of duration, and the work of seasonal workers are counted as fractions of AWU. The staff consists of:

- employees;
- persons working for the enterprise being subordinated to it and deemed to be employees under national law;
- owner-managers;
- is autonomous

partners engaging in a regular activity in the enterprise and benefiting from financial advantages from the enterprise.

ATTENTION: Apprentices or students engaged in vocational training with an apprenticeship or vocational training contract can not be included as staff. The duration of maternity or parental leaves is also not counted.

The data to apply to the financial amounts (e.g. turnover and balance sheet), as well as to the headcount of staff, are those relating to the latest approved accounting period and calculated on an annual basis. They are taken into account from the date of closure of the accounts. The amount selected for the turnover is calculated excluding value added tax (VAT) and other indirect taxes.

In the case of newly-established enterprises whose accounts have not yet been approved, the data to apply is to be derived from a bona fide estimate made in the course of the financial year. These organisations must insert "N/A" for the two questions relating to the duration and the closing date of their last approved accounting period.

33. Non-SME

An enterprise that is not an SME.

39. Security Aspect Letter

See Appendix 4 of the Negotiation Guidance Notes.

40. Funding % for RTD/Innovation activities

For research and technological development activities, the European Union financial contribution may reach a maximum of 50% of the total eligible costs.

However, for beneficiaries that are non-profit public bodies, secondary and higher education establishments, research organisations and SMEs, the rate may reach a maximum of 75% of the total eligible costs. If these beneficiaries change their status during the life of the project, this reimbursement rate shall be applicable up to the moment they lose their status.

41. Indirect costs

Indirect costs are all those eligible costs which cannot be identified by the beneficiary as being directly attributed to the project, but which can be identified and justified by its accounting system as being incurred in direct relationship with the eligible direct costs attributed to the project. They may not include any eligible costs.

42. Actual indirect costs

Beneficiaries who have an analytical accounting system to identify their indirect costs are allowed to claim actual indirect costs.

43. Simplified method

If it is in accordance with its usual accounting and management principles and practices, a beneficiary is allowed to use a simplified method of calculation of its full indirect eligible cost at the level of its legal entity. Use of such a method is only acceptable where the lack of analytical accounting or the legal requirement to use a form of cash-based accounting prevents detailed cost allocation. The simplified approach must be based on actual costs derived from the financial accounts of the period in question.

44. Standard flat rate

A beneficiary may opt for a flat rate of 20% of its total eligible costs excluding the costs for subcontracting and the costs of reimbursement of resources made available by third parties that are not used on the premises of the beneficiary

45. Special transitional flat rate

Non-profit public bodies, secondary and higher education establishments, and research organisations and SMEs, which are – due to the lack of analytical accounting – unable to identify with certainty their real indirect costs for the project, when participating in funding schemes which include research and technological development and demonstration activities, as referred to in the table of Article II.16 of the grant agreement, may opt for a flat-rate of 60% of the total direct eligible costs excluding costs for subcontracting and the costs of reimbursement of resources made available by third parties which are not used on the premises of the beneficiary. If these beneficiaries change their status during the life of the project, this flat rate shall be applicable up to the moment they lose their status.
