## 1. General information

The domain name of the NORS website is <http://nors.aeronomie.be>. It is hosted by the coordinator, BIRA-IASB, and managed by the Project Manager, who will update it regularly with new information throughout the whole duration of the project. The website is built in a JOOMLA CMS (content management system) environment.

The NORS website follows the template of the GMES website. The NORS logo is directly inspired by the GMES logo.

The purpose of the public part of the website is to inform the broad public and scientific community about the project. It is also used to exchange project results and to link to the websites of partners.

The private part of the website (Documents) is a password protected area for people who are related to the project. It is used to make all documents available to all project's partners (reports, deliverables, minutes of meetings etc).

New users can easily request an account through the Login Form on the Documents page. A confirmation is automatically sent once the webmaster has accepted the new user.

The homepage displays the emblem of the European Community and of the Seventh Framework Programme. It mentions that this project has received research funding from the European Community's Seventh Framework Programme ([FP7/2007-2013]) under grant agreement n°284421.

## **2. Structure**

### **2.1. Home**

This page contains a short abstract of the NORS project, a mention about funding and an e-maillink to the contact point.

### **2.2. Project**

This section describes the NORS project. It is further subdivided in 'Objectives', 'Methodology' and 'Progress beyond the state-of-the-art'.

### **2.3. Partners**

This page contains the list of the project's partners and their websites.

### **2.4. Related Initiatives**

This page contains a list of related initiatives to the NORS project and their links.

### **2.5. Results**

This page will contain interesting results of the NORS project. It is further subdivided in 'Peer Reviewed Publications', 'Presentations' and 'Posters'.

### **2.6. Documents**

This page is restricted for connected users. It contains interesting documents for members of the NORS consortium. It is further subdivided in 'Meetings', 'Reports', 'Deliverables' and 'Other Documents'.
